Upholstery Selections

Distinguish your space with **color.**

Color is an important part of establishing your distinct brand. It's more than visual appeal. Color can transform your space into something you won't just see, but you will feel, too.

Although there is no direct link between specific colors and health outcomes, colors can influence how patients experience the space. Soothing tones and textures can aid in creating an environment that feels less clinical and more inviting. As you will see in this guide, we offer many upholstery color selections to complement the look, feel and intended function of your space.
