

Concerned about over vaccination?

Is it necessary to give Ruff his booster shots OR is he still protected?

VacciCheckUSA

A SINGLE, RAPID, IN-HOUSE TITER TEST FOR THE 3 CORE CANINE VACCINES!

\$20*, 21 MINUTES, WHILE PATIENT WAITS!

with the introduction of:

VacciCheckTM
Antibody Test kit

Utilizing ImmunoComb[®] Technology

order today by calling (800) 553-1391

The Canine VacciCheck™ is a quick, simple & affordable dot ELISA titer test kit intended for detection of antibodies to:

- Parvovirus (CPV)
- Distemper (CDV)
- Infectious Hepatitis (*tested by Adenovirus Type 2 - CAV2*)

**Monitors serological status & vaccination failure.
Eliminates over-vaccination consequences.**

What benefits does the Canine VacciCheck™ provide?

- ✓ 3 diseases in just 1 test.
- ✓ Solid phase "dot" ELISA.
- ✓ The only semi-quantitative in-house kit in the market.
- ✓ Rapid and simple. Results in 21 minutes-while patient waits.
- ✓ Kit includes supplies for 12 tests. Can be administered individually.
- ✓ Self contained. 1 year shelf life.
- ✓ Confirms success/failure of puppy immunization protocol.

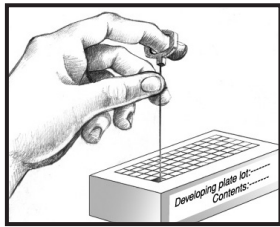

5 simple steps, results within 21 minutes!

NO SPECIAL TRAINING REQUIRED

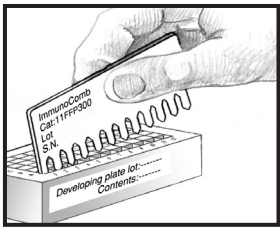

1

Obtain blood from pet(s).

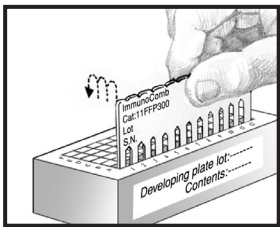

2

Deposit blood or serum sample(s) into well(s) A in developing plate.

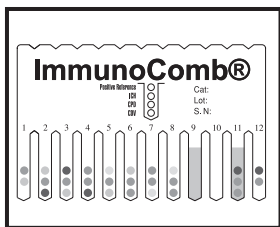

3

Insert Comb into well(s) A. Incubate for specified time.

4

Transfer the Comb from well(s) A to wells(s) F in a timed sequence. Time intervals vary according to type of Kit.

5

Let Comb dry and read results. The color intensity of spots on Comb corresponds to antibody level.
