

DiroCHEK[®]

Heartworm Antigen Test Kit

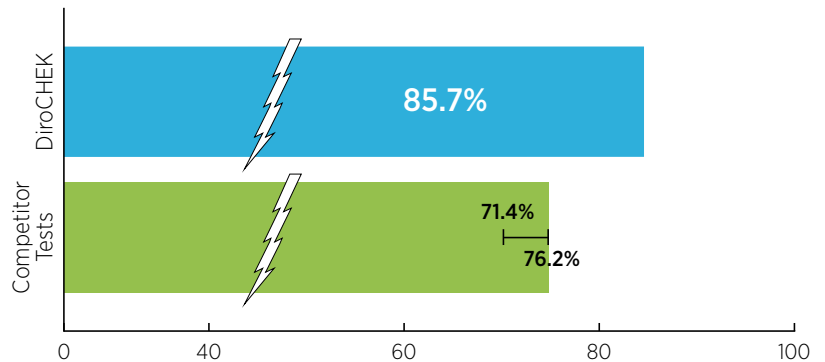

An ELISA test kit for the detection of canine and feline heartworm infections

Choose Excellent Detection for Low Heartworm Burden Infections¹

In Multiple Canine Heartworm Infestations (≥ 3 females)

- Sensitivity 100%
- Specificity 100%

Superior Single Canine Heartworm (Female) Infestation Sensitivity

100% Specificity

For Animals. For Health. For You.

Because Low Heartworm Burden Matters

Technical Specifications	
Description:	A qualitative enzyme-linked immunosorbent assay (ELISA) test kit for the detection of <i>Dirofilaria immitis</i> antigen in canines or felines
Antigens Detected:	<i>D. immitis</i> antigen in canines or felines
Use Situations:	For the detection of canine or feline heartworm infections
Sampling:	50 µL of plasma or serum is used for testing
Performance (≥ 3 female heartworms)¹:	Sensitivity 100% Specificity 100%
Test Time:	Results available in approximately 15 minutes
Packaging:	Lab Pack: 144 wells (breakaways) for up to 140 tests per kit Kilo Pack: 1056 wells for up to 1034 tests—11 plates with 96 wells each Store test kit at 36-45°F (2-7°C) (do not freeze)
