

The convenient choice for protection against *Bordetella bronchiseptica* NEW Nobivac® Intra-Trac® Oral Bb

Nobivac® Intra-Trac® Oral Bb provides protection against *Bordetella bronchiseptica* in an easy-to-administer oral formulation.

Recommended for the vaccination of healthy dogs at 7 weeks of age or older as an aid in the prevention of Canine Infectious Tracheobronchitis (“kennel cough”) due to *Bordetella bronchiseptica*.

Dosage and Administration:

- Aseptically reconstitute the desiccated vaccine with the sterile diluent provided
- Remove the needle and administer 1 mL ORALLY into the buccal cavity

Presentation: 25 x 1 dose

Why vaccinate with Nobivac® Intra-Trac®?

- To keep dogs under your care and staff dogs happy and healthy
- To keep pet parents happy by sparing their dogs from annoying cough attacks
- To protect other dogs in the community
- To prevent outbreaks in your practice, your boarding facility, and in your community

And if you board dogs, there's more:

- To prevent costs for decontamination
- To prevent loss of income because of facility closure
- To preserve your good reputation

Who's at risk?

- Social dogs
- Dogs in boarding facilities
- Dogs in doggie daycare
- Dog show dogs
- Dog park dogs
- Dogs with groomers
- Kennel/shelter dogs
