> 20 lbs.	2–4 Daily	200–400 Billion

**Consult with your veterinarian to determine if Visbiome Vet Constipation Care is right for your cat.**

# How Visbiome Vet Constipation Care Works

Constipation in cats is described as the infrequent or challenging passage of dry, hard stools, with an increased susceptibility in old or overweight cats.

**Visbiome Constipation Care is the first probiotic of its class formulated and clinically tested to address the needs of cats with occasional constipation.**

The probiotics in Visbiome Vet Constipation Care balance the gut's natural bacteria, promoting a healthier cat digestive process. They enhance intestinal movement, stimulate the production of helpful substances for smoother stool passage, and reduce factors that slow down the gut. Simply put, Visbiome Vet Constipation Care assists in making your cat's bowel movements more regular and comfortable.
