

EQUISTRO®

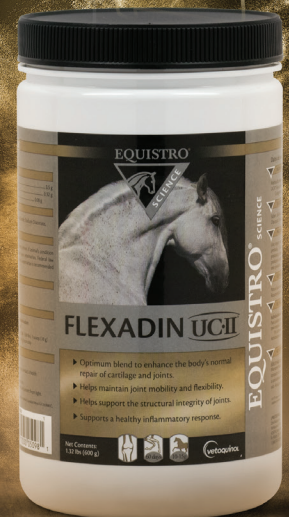

FLEXADIN UCII

Support the Structural Integrity of Joints

FLEXADIN UCII helps maintain cartilage structure and support joint health. Its unique patented Undenatured Type II collagen ingredients promote oral tolerization of collagen in the joint and helps relieve occasional joint stiffness and swelling, resulting in less soreness and discomfort. Once daily administration supports function, mobility and physical activity.

- ▶ Helps maintain normal cartilage structure
- ▶ Supports healthy joint function and flexibility
- ▶ Promotes joint integrity and structure

Backed by Research

UC-II® works with the immune system to promote a normal response to joint therapy, thereby helping to support joint mobility and flexibility.

(Trentham et al., 1993; Trentham, 1998; Bagchi et al., 2002).

UC-II® helps promote a reduction in discomfort.

(Bagchi, et al 2002, Gupta, et al 2009).

Daily administration of **UC-II®** has been shown to reduce the signs of discomfort in horses.

(Gupta, et al 2009)

 Administer banana flavored powder once daily at feeding time.

Initial Dosage 1 ½ scoops (15 grams) daily for 12 weeks

Maintenance Dosage 1 scoop (10 grams) daily

The EQUISTRO® range offers specific individualized and trusted solutions for sport and competitive horses which meets both of these requirements.

— William Fox-Pitt
