

At the first sign of client complaint, veterinarians should initiate management. Ask direct questions.

**Are you having any trouble with destructiveness or house soiling?<sup>7</sup>**

*Solliquin is formulated to help facilitate contentment during periods of adjustment in a pet's daily routine.*

**A COMPREHENSIVE APPROACH FOR BEHAVIORAL DISORDERS:**

The specific cause of a pet's anxiety may be difficult to isolate, and many anxiety issues occur in combination.<sup>8</sup> The proper approach should be multi-modal.

*"I encourage clients to administer a behavioral nutritional supplement for at least 4-6 weeks. While some benefits are apparent immediately, the full effect may be more noticeable in the second month of continuous administration."*

—Theresa L. DePorter, DVM, MRCVS, DECAWBM, DACVB

- Relaxation without sedation<sup>1</sup> • Intended for daily use • Tasty chewables

For Small Dogs and Cats	Under 8 lbs	60 count	Soft Chews	1* chew per day

BEHAVIORAL HEALTH SUPPLEMENT

03.1.063.03

# The #1 reason dogs are surrendered to animal shelters is bad behavior.<sup>1</sup>

Anxiety, fear, and stress play major roles in a majority of canine and feline behavioral disorders.<sup>2</sup>

Fear and anxiety disorders affect an estimated 23 million dogs in the U.S.<sup>3</sup>

In pet cats, behavior problems are still the most common cause of euthanasia.<sup>4</sup>

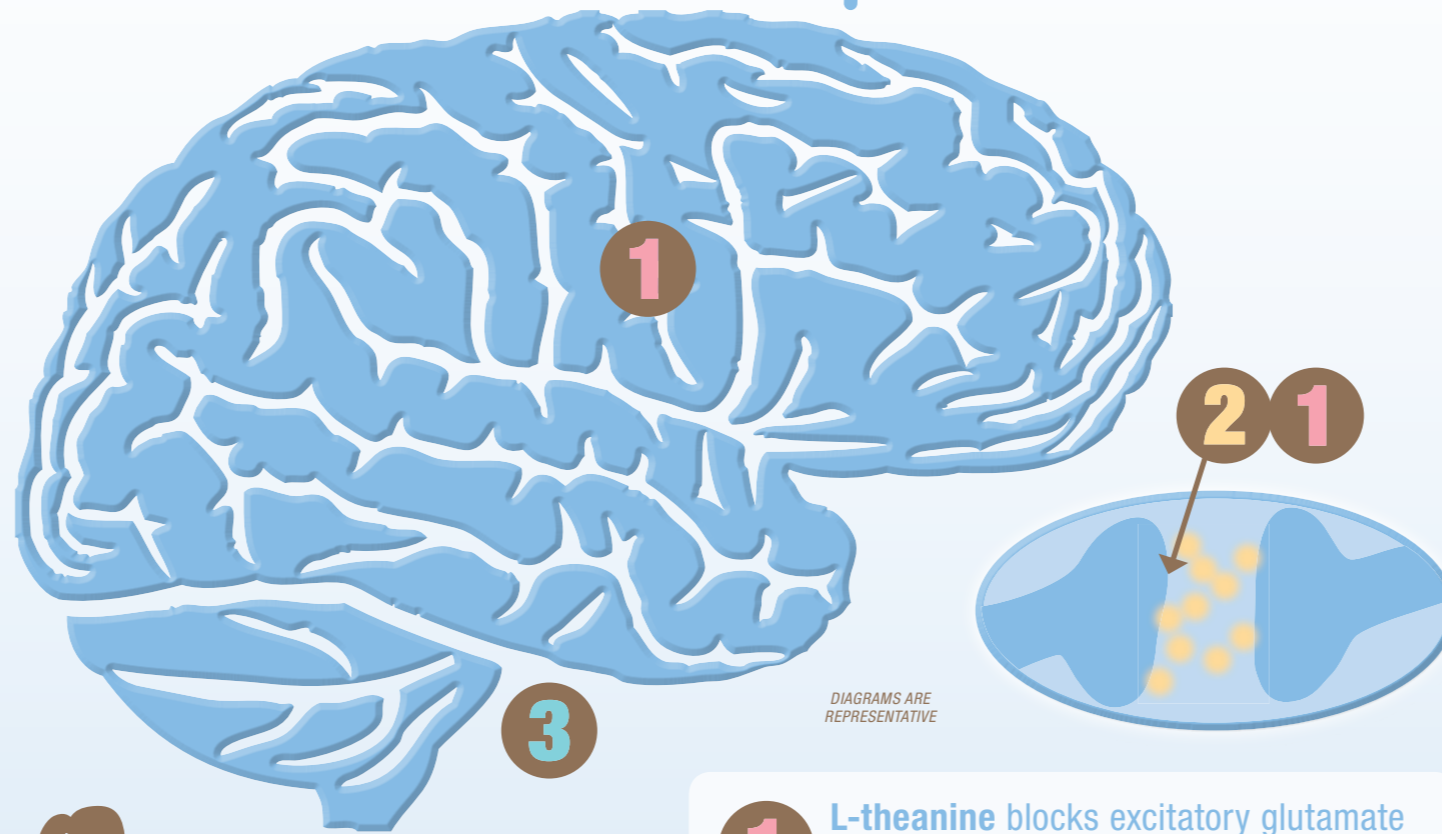

Up to **54%** of pet owners whose pets have behavioral issues have **NOT** consulted a veterinarian.<sup>5</sup>

Pet owners are more likely to consult free help options such as: the internet, trainers, breeders, and friends.<sup>5</sup>

Veterinarians lose up to **15%** of their client base each year due to unresolved behavioral issues.<sup>6</sup>

# Solliquin<sup>®</sup>

## BEHAVIORAL HEALTH SUPPLEMENT

- 1 L-theanine** blocks excitatory glutamate receptors at the synapse while also stimulating the production of alpha brain waves throughout the brain.<sup>9,10</sup>
- 2 Magnolia and Phellodendron extracts** contain compounds which enhance the release of stabilizing GABA while blocking the release of glutamate at the synapse.<sup>11-14</sup>
- 3 Whey protein concentrate** supplements amino acid precursors required to synthesize serotonin and glutathione.<sup>15,16</sup>

# Solliquin<sup>®</sup> contains multiple active ingredients all in one chewable supplement.

Solliquin<sup>®</sup> is for dogs and cats to help support normal behavior and facilitate a calming effect.
