Cardio Pro features a combination of 11 active ingredients that are essential for maintaining cardiovascular health and function in cats and dogs.

HYDROLYZED CHICKEN LIVER FLAVOR

RECOMMENDED FOR:

- › Dogs and cats with prior heart issues
- › Breeds that are predisposed to cardiovascular issues
- › Senior and geriatric pets

Cardio Pro is a clinical strength formula that helps maintain cardiovascular health in cats and dogs.

Cardio Pro is a comprehensive formula featuring 11 active ingredients that support cardiovascular health and function in cats and dogs of all ages. It's specifically recommended for animals with prior heart issues, breeds pre-disposed to cardiovascular stress and senior or geriatric pets. It consists of amino acids, vitamins, minerals and herbs that are essential for healthy cardiac function.

ABOUT THE INGREDIENTS:

- › L-Taurine is an amino acid that plays a key role in the proper functioning of the heart muscle. It supports a regular heartbeat, utilization of oxygen and electrolytes, and immune system health.
- › L-Carnitine is an amino acid that supports the use of fat for energy and oxygen utilization. It also promotes fat metabolism, which helps balance cholesterol and triglycerides levels, as well as supporting the heart's energy levels.
- › N,N-Dimethylglycine (DMG) is an antioxidant that supports circulation and blood flow.
- › Vitamin E is a potent antioxidant that supports circulation, heart muscle strength and immune system health. It also promotes tissue repair, proper blood clotting, normal blood pressure, and strengthening of capillary walls.
- › Eicosapentaenoic Acid (EPA), an omega-3 fatty acid, and Gamma Linolenic Acid (GLA), an omega-6 fatty acid found in black currant seed oil, support circulation and blood flow.
- › Coenzyme Q10 (CoQ10) supports oxygenation of the heart tissue and helps protect against oxidation. As a lipid soluble antioxidant, CoQ10 also helps strengthen the heart muscle.
- › Hawthorn Phytosome is a more bioavailable form of this well-researched herb shown to support blood flow and circulation.
- › Folate promotes the formation of red blood cells and capillary blood flow.
- › Magnesium supports proper functioning of the cardiac muscle. It helps to maintain the integrity of blood vessel walls, normal blood viscosity (thickness), and a normal heartbeat.
- › Potassium is required for electrolyte balance, which is critical for proper heart rhythm and blood pressure.
- › Selenium provides antioxidant support within the heart muscle. It is a component of glutathione peroxidase and works with Vitamin E to maintain a healthy heart.

DIRECTIONS FOR USE:

Dogs: Give 1 chew per 30 lbs of body weight, daily. If giving more than 1 chew, divide between AM and PM.

Cats: Give ½ chew, daily.

Break into smaller pieces for finicky eaters.

PRODUCT FACTS:

Active Ingredients per Chew (3.5 g):

L-Carnitine HCl	250 mg
L-Taurine	250 mg
N,N-Dimethylglycine HCl	50 mg
d-alpha Tocopheryl Succinate (Vitamin E)	30 IU
Eicosapentaenoic Acid (EPA) (Fish Oil)	25 mg
Coenzyme Q10	20 mg
Hawthorn Phytosome	9.5 mg
Folic Acid	0.9 mg
Magnesium (Magnesium Oxide)	0.5 mg
Potassium (Potassium Citrate)	0.1 mg
Selenium (Sodium Selenite)	0.007 mg

Inactive Ingredients: arabic gum, black currant seed oil, brewer's yeast, calcium sulfate, canola oil, citric acid, citrus pectin, glycerin, hydrolyzed chicken liver flavor, maltodextrin, mixed tocopherols, oat flour, oat meal, propionic acid, rosemary extract, rye flour, silicon dioxide, sodium alginate, sorbic acid, soy lecithin, vegetable oil.
