

ANTIMICROBIAL WOUND & SKIN HYDROGEL

Vetericyn Plus[®] VF Antimicrobial Hydrogel for Veterinarians is specially formulated for moistening and debriding wounds of all types. It contains synthesized hypochlorous, a known antimicrobial also produced by the animal during phagocytosis that can be used on all tissue without harming fibroblast cells.

Item #2042

Item #2040

Uses

- + Acute and chronic wounds
- + Cuts & abrasions
- + Burns, sores, ulcers
- + Degloving injuries
- + Dermal and mucosal irritations
- + Lower-extremity wounds, pads on feet, interdigital areas

- + Post-surgical applications
- + Reduces pain and odor

Veterinary Supply, Inc.

Vetericyn Plus[®] VF contains Hypochlorous Acid, a known antimicrobial, which serves as a preservative to inhibit the growth of microorganisms in the solution.

IMPROVED APPLICATION.

Our hydrogel formula has been enhanced to make it easier to use for dermal applications, moisture donation for wound management, or applying to dressings with pinpoint accuracy.

Features

- Vetericyn Plus[®] VF has been shown to have anti-pruritic activity along with antimicrobial action
- Spray-on formula allows for easy application and adheres to site on contact, thus minimizing discomfort to the animal
- Two sizes for in-clinic and patient use
- Sprayable gel moistens and softens tissue for easier wound bed preparation
- No antibiotics or steroids - safe for use in animals with systemic disease, such as diabetes

Benefits

- Aids in autolytic debridement
- Reduce incidence of exuberant granulation tissue (proud flesh)
- Provides itch and pain relief of dermatological ailments
- Protects wound bed from foreign bodies
- Adheres to areas difficult to treat
- Safe for use on newborn animals even before eyes open
