

CHLORHEXIDINE PS MICRO-EMULSION SPRAY

Antiseptic solution with Chlorhexidine and Phytosphingosine

TECHNICAL SPECIFICATIONS:

Sub-micronic emulsion

Phytosphingosine salicyloyl 0.05% – CAE 0.3% - Chlorhexidine 3% - cationic surface active agent.

INGREDIENTS:

Need list.

PROPERTIES:

Chlorhexidine has a strong bactericidal and bacteriostatic activity on the Gram positive and Gram negative bacteria.

Phytosphingosine is a pro-ceramide that helps restore the skin barrier, and also has anti-inflammatory properties.

CAE is a moisturizing agent; it helps restore the damaged skin. It possesses also antibacterial and antifungal properties which complement those of chlorhexidine.

DIRECTIONS FOR USE:

External use only

Brush the pet against the natural fur line, and spray the product just by holding the pump 12 inches (30 cm) from the pet's body, so as to spread out the emulsion all over the targeted area.

The product will disperse naturally; do not over apply.

Dosage:

1 spray per 10 lbs (5 kg)

The number of sprays can be doubled for long-haired dogs.

The veterinarian's recommendations should be observed. It is generally recommended to apply twice a week.

SPECIES:

Dogs and cats: to be used in the management of superficial to severe skin conditions that are responsive to chlorhexidine. To be used in protocol with DOUXO® Chlorhexidine +Climbazole Shampoo to facilitate the long term management of the condition.

PRECAUTIONS:

Do not swallow. Avoid contact with the eyes. Keep out of reach of children.

If undue skin irritation develops or increases, discontinue use and consult a veterinarian.

STORAGE:

Store at controlled room temperature.

PRESENTATION:

Bottle of 200 ml
