# Diabetes Maintenance Journal

---

**Home monitoring enhances communication between veterinary professionals and pet owners, enabling faster recognition of inconsistent blood glucose levels that may help your vet address your pet's changing physiology. The iPet PRO logbook is designed to complement in-home testing by providing a resource for tracking the recommended diabetes protocol for your pet, as well as the results of your in-home monitoring.**

Please consult your veterinary professional for specific directions to manage and monitor your pet's diabetes.

The iPet PRO Blood Glucose Monitoring System is specifically designed for cats, dogs and horses. Please consult the User Guide or User Quick Guide for information to operate and maintain the device.

**Customer Service Hotline:** 1-877-854-3434

**Website:** [www.ulticare.com](http://www.ulticare.com)

When you call customer service, please have your iPet PRO meter, iPet PRO test strips and all other system supplies available. This will allow us to answer your questions with speed and efficiency.

B05Z105060/REV.0/V002-2016-11

The maintenance journal provides a place for your veterinary professional to share instructions for your pet's home testing needs and diabetes maintenance. Do not alter these directions without consulting your veterinary professional.
