

# QuickDERM™

ADVANCED WOUND OINTMENT

A NEW, INNOVATIVE TECHNOLOGY FOR HARD TO HEAL WOUNDS AND BURNS IN SMALL ANIMALS AND PETS.

## Results for Max

After one week of QuickDerm

*"QuickDerm is a wonderful product and I was amazed with the results. Max (our dog) also has diabetes, which makes the healing process especially difficult. But after applying QuickDerm for one week directly to his wound...well, the results speak for themselves! I love my dog and could not bear to see him suffer and I am so thankful there is a product on the market that yields such miraculous results."*

*-Jeff McGahee*

## Results for Belka

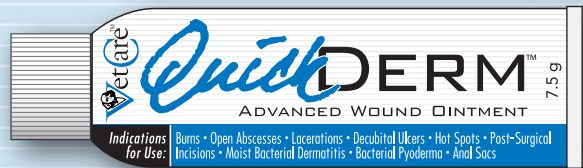

Severe lick granuloma on Lab healed after 2 months using QuickDerm once a day.

*"It will be my pleasure to let you know how happy we are with your product. QuickDerm has completely exceeded our expectations! We are amazed with how quickly her wound has closed. After several months of weekly vet visits including numerous attempts to stitch the wound closed, we were convinced it was a lost cause. So needless to say we couldn't be more pleased and impressed with QuickDerm. Thank You Very Much."*

## Results for Gabby

Gabby, a small feline burned over 30% of her body. After 45 days of QuickDerm, Gabby healed with no scarring and complete hair regrowth.

*"I used QuickDerm on Gabby's burns. I knew from past experience that this was the only product that would work fast and reduce the pain quickly. Results were amazing, and I will continue to use QuickDerm in my clinic."*
