

CranMate™

A Chewable Nutritional Supplement to Support Urinary Tract Health

Urinary tract infections can be agonizing for the animal and frustrating for the owner. CranMate™ Nutritional Supplement is formulated specifically to support a healthy urinary tract in dogs and cats.

Most of the benefits available from cranberry are derived from the unique structure of natural tannins called proanthocyanidins (PACs). CranMate is rich in PACs from 10% cranberry fruit extract (*Vaccinium macrocarpon*) not cranberry juice concentrate. The patented extraction process eliminates unwanted sugars and oxalic acid resulting in a product that meets the needs of animals with diabetes mellitus.

The bioactive PACs in CranMate contain an unusual A-type linkage different from the more common B-type linkage found in proanthocyanidins from other foods. These PACs support healthy urinary systems, those with disturbances and those that are prone to UTIs. CranMate also supports urinary systems that are on long-term medication for urinary incontinence and will not interfere with antibiotics.

Why CranMate?

- Chewable/scored tablet
- Contains 100 mg of American cranberry extract of 10% proanthocyanidins
- No unwanted sugar
- Liver-flavored
- Highly palatable

PET WEIGHT (lbs)	TABLETS/DAY
