

SMALL ANIMAL DENTAL SCALER/POLISHERS

A “MUST HAVE” FOR A VETERINARY PRACTICE IN THE PREVENTION OF PERIODONTAL DISEASES

The most frequent dental disorder found in pets is Periodontal disease. Just like in humans, it’s a result of bacterial plaque build-up and calculus.

Without an effective hygiene program, many pets experience negative consequences such as: bad breath, inflammation and bleeding of gums, gingival retraction, and loose or lost teeth.

With the use of scaler/polisher cleaning units in the veterinary practice, animal patients can maintain oral hygiene and overall physical health.

FEATURES

- ▶ Contemporary design with a small footprint
- ▶ Includes in-line water filter, micromotor, polisher hand piece, prophy angle, prophy cups, and paste starter kit
- ▶ Quick release attachment for water tank set-up (J0452D23) (Optional water tank J0452D4)
