## Flexadin® Advanced – a breakthrough product containing UC•II®

Flexadin® Advanced with UC•II® is clinically proven to be more effective than glucosamine and chondroitin.\* With the unique active ingredient UC•II®, Flexadin® Advanced works differently than traditional supplements. It can slow the progression of cartilage loss, helping retain mobility and reduce stiffness.

### What is UC•II®?

- A unique and proprietary form of undenatured type-II collagen which works through oral tolerization to help maintain the normal metabolism of joints
- Its advanced formulation helps support normal joint function by targeting the immune system

UC•II®

Chew for Cats & Dogs

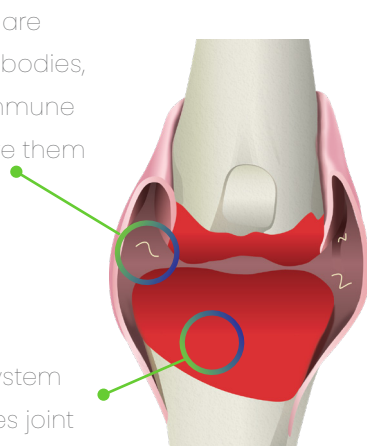

Powder for Horses & Ponies

## How Flexadin® Advanced with UC•II® works

JOINT SHOWING IMMUNE RESPONSE

FLEXADIN® ADVANCED WITH UC•II® HELPS MINIMIZE DISCOMFORT

Loose bits of collagen are recognized as foreign bodies, which activates the immune system to try to remove them

As the immune system activates, it causes joint stiffness and soreness

Flexadin® Advanced with UC•II® targets the immune system in a process called oral tolerization

Helping the immune system maintain normal joint function and slow progression of cartilage loss

\*Companion Animal: Based on a 120-day clinical study comparing 10mg active Type II Collagen to 2,000mg glucosamine and 1,800mg chondroitin (D'Altilio et al, Toxicology Mechanisms and Methods, 2007). Equine: Based on a 150-day clinical study comparing [120mg initial and/or 80mg maintenance active Type II Collagen] to 5.4g glucosamine and 1.8g chondroitin (Gupta et al, Journal of Veterinary Pharmacology and Therapeutics, 2009).

## CATS & DOGS

### Pet-friendly administration that's highly palatable

-  One chew a day, any size cat or dog
-  No loading administration period
-  A taste cats and dogs love!

### Palatability study<sup>1</sup>

Percentage of cats and dogs that enjoy the taste of Flexadin® Advanced with UC-II®

## HORSES

-  Tasty banana-flavored powder
-  Once-daily administration, backed by a comparison study in horses, can help improve flexibility, mobility, and physical activity

**Initial Administration:** For horses and ponies: Body weight: 100 - 2500 lbs  
- Administer 1 ½ scoops (15 g) once daily for up to 12 weeks.

**Maintenance Administration:** For horses and ponies: Body weight: 100 - 2500 lbs  
- Administer 1 scoop (10 g) once daily.

## Flexadin® Advanced with UC•II®
