

# CAT+ Doppler / Blood Pressure Monitor

The **CAT+ DOPPLER / BLOOD PRESSURE MONITOR** allows a practitioner to monitor conscious blood pressure for hypertension, as well as listen to a pulse while patient is under anaesthesia.

Item # 48516

## MONITORING WITH THE CAT+ DOPPLER IS EASY:

- Swab pulse site with alcohol or warm soapy water
- Fit blood pressure cuff
- Apply ultrasound gel to pulse monitoring site
- Lightly place probe over pulse site
- Turn on CAT+ Doppler and adjust to preferred volume
- Continue to hold probe over pulse or tape in place while monitoring patient

### CARRYING CASE INCLUDES:

- 5 different sized cuffs
- User replaceable, rechargeable batteries - simply swap batteries while using with no downtime
- Headphones - useful for anxious patients
- Sphygmomanometer and CAT+ Doppler
- Mini Kit also available

Item # 48515
