AniSet Anti∞Kink®

IV tubing that gives you less of this: And more of this...

The AniSet" range of IV fluid administration sets and accessories represents the highest quality, purpose built veterinary IV set available on the market today.

Proprietary features, designed and developed to meet the needs of the veterinary professional. The AniSet" range of IV sets and accessories offer the most versatility and flexibility providing complete peace of mind whilst the animal patient is in your care. AniSet" IV sets are available for both large and small animals offering fluid at rates of 5ml per hour through to the large animal sets of up to 50£tres per hour. Animili IV sets and accessories are Chemotherapeutic compatible.

Self priming end cap

- · Allows the set to prime itself without cap tremoval.
- · No fluid loss, waste or mess.

L/L Connector

Secure connection to any IV line accessory or catheter.

Can be slid back if required creating an S/L connection.

S/L Connector

Joins to an indwelling catheter with a push fit connection.

Anti-Kink® Spiral Tubing

 Allows for a longer length. Ideal for patients in larger recovery areas and runs

Distal Injection port

For immediate effect of additional medication.

Extention tubing

Built-in extention tubing saves you money!

Anti-Kink® tubing

- Continuous fluid flow.
- No tube occlusions. IV Pump alarms sound only when necessary.
