

# REBOUND PRP/PRF KITS

INJURIES ARE NOT ALL THE SAME AND EVIDENCE PROVES THAT YOUR PRP SHOULD BE ADAPTABLE

JorVet has now partnered with Enso Discoveries to provide Platelet-Rich-Plasma (PRP) and Platelet-Rich-Fibrin (PRF) kits. Designed by expert regenerative medicine veterinarians — all backed by scientific evidence and funded veterinary research.

All three kits offer economical options for PRP therapies, fast processing time of 30 minutes (including fibrin kit) from draw to injection application, and applicable to Equine, Canine, Feline, and Bovine therapies. Sterile with long shelf life. Adaptable system allows for custom PRP applications. Portable packaging designed to aid maintenance of preparation and sterility during use.

## TYPICAL INTENDED USE

- ▶ Adjunct to surgical procedures
- ▶ Tendons/Ligament injuries
- ▶ Osteoarthritis and bone regeneration
- ▶ Fully adaptable therapies (Leukorich or Leukopoor PRP)
- ▶ Acute, chronic and non-healing wounds and burns
- ▶ Graft stabilization
- ▶ Theriogenology
- ▶ Ophthalmology
- ▶ Dentistry

## BENEFITS

- ▶ Autologous
- ▶ Minimally invasive
- ▶ Accelerated healing
- ▶ Fast processing time

\*Kit contents vary depending on kit purchased

## PRP KIT USES

- ▶ Partial cruciates and/or adjunct to surgery
- ▶ Osteoarthritis, Ophthalmology, Dentistry
- ▶ Knee and soft tissue injuries
- ▶ Problem wounds and burns
- ▶ Surgery non-candidates
- ▶ Theriogenology

### Benefits

- ▶ Alternative to long-term drug use or surgery
- ▶ Autologous (safe)
- ▶ Minimally invasive (blood draw and injection)
- ▶ Disease-modifying treatment
- ▶ Service based fees

## PRF W/FIBRIN KIT USES

- ▶ Acute, chronic and non-healing wounds
- ▶ Dentistry - multiple tooth extractions, feline gingivitis, carnassial extractions, equine extractions
- ▶ Soft or hard tissue injuries
- ▶ Bone regeneration
- ▶ Graft stabilization
- ▶ Homeostasis

### Benefits

- ▶ Autologous fibrin matrix
- ▶ Contains platelets and growth factors
- ▶ Resorbable, sutureable membrane
- ▶ Accelerates healing

## SUPRA PRP KIT USES

- ▶ Treatment for multiple injuries, multiple joint injections in larger animals
- ▶ Acute, chronic and non-healing wounds
- ▶ Inflammation

### Benefits

- ▶ Capable of processing 60ml of whole blood - produces up to twice the volume of plasma of a regular kit (20ml)
- ▶ Allows the clinician to choose at the time of harvest, whether to include or exclude white blood cells from the harvested plasma
- ▶ Promotes healing in ligaments, tendons and joints
- ▶ Designed exclusively for animal blood
- ▶ Autologous (safe)
