**JOINT HEALTH SUPPORT MADE EASY**

## A Patented Joint Supplement Developed Specifically For Dogs

As pets live longer, they display many signs of aging – including joint discomfort. If you're like most veterinarians, you treat more animals with joint issues than ever before.

There are numerous joint products available and many of your clients are interested in alternative methods of supporting normal joint function and they rely on you, their pets' veterinarian, to provide recommendations.

### THAT'S WHY WE DEVELOPED THE FAMILY OF HIGH-QUALITY PHYCOX JOINT SUPPLEMENTS.

Veterinarians and pet owners have trusted the Phycox brand as an oral supplement that offers pet owners a clear option for the health of their dogs. Phycox is a complete formula that helps maintain healthy cartilage and joint mobility in dogs, young and old. As joint discomfort decreases, many dogs become more playful – your clients will see the difference in their dog.

Phycox is the convenient choice for veterinarians, pets and pet owners.

## The Only Joint Supplement With Phycocyanin

Phycox is the only joint health supplement with a novel, patented joint support matrix containing phycocyanin. Phycocyanin is a natural antioxidant that has powerful free radical scavenging properties and supports the body's normal defense against the harmful effects of free radicals that cause cellular damage, and inflammation. Clinically, this may help ease discomfort associated with normal daily exercise and activity. (US Patent 7,025.965)

### A Complete Joint Supplement

Phycox is a complete formula that provides a comprehensive blend of beneficial ingredients for joint health - phycocyanin, glucosamine, MSM, antioxidants, creatine and more. This unique blend of phycocyanin and beneficial ingredients helps support bone, muscle, and joint health.

### Phycox Soft Chew Ingredients

#### Phycox Original Formula

- Antioxidant Support: Phycocyanin, Alpha Lipoic Acid, Vitamin C, Vitamin E, Calcium Phosphate, Citrus Bioflavonoids, Grape Seed Extract, Selenium, Manganese Sulfate, Zinc Sulfate
- Joint Function: Flaxseed Oil, Turmeric, DHA, EPA
- Joint Health & Cartilage: Glucosamine, MSM
- Muscle Health & Strength: Creatine Monohydrate
- Bone Health: Boron

#### Phycox MAX Formula

Contains all the ingredients found in original Phycox, plus 6 additional ingredients to aid in senior health and advanced joint support:

- Antioxidant Support: Cinnamon, CoQ10
- Weight Management Support: Gymnema Sylvestre, Chromium Picolinate
- Joint Function: Decaffeinated Green Tea Extract
- Urinary Tract Health: Cranberry Extract

## A Joint Supplement With Noticeable Benefits

An observational safety study\* with 12 dogs documented no adverse events even with oral administration of 16 times the labeled dosage of Phycocyanin. The dogs remained healthy and maintained body weight throughout the course of the study without any dose-related adverse events reported.

Thousands of veterinarians and pet owners have come to know and trust Phycox to deliver a safe, natural way to improve pets' quality of life by supporting their joint health. This trust comes from delivering great results.

A clinical study\* evaluating 69 dogs with joint discomfort that received Phycox Soft Chews to help support healthy joints showed statistically significant owner-perceived improvements in mobility, playfulness, alertness, activity level, ability to rise, discomfort level and enthusiasm to run outside. The result was happy dogs and happy owners.

## 100% Palatability Guaranteed

Dogs love the taste of Phycox. In fact, we guarantee the palatability of our products. If your clients are not 100% satisfied with the palatability of Phycox Soft Chews or Granules, we will unconditionally replace any product returned to your hospital.

### The Complete Phycox Line of Nutritional Joint Supplements

#### Phycox Soft Chews

The original formula is recommended for active dogs and dogs of all ages who require a moderate level of joint support.

#### Phycox MAX Soft Chews

Recommended for sporting and working dogs, and dogs of all ages who require a maximum level of joint support. Phycox MAX chews contain 3X the phycocyanin as compared to Phycox original formula, and six additional ingredients to aid in senior health and advanced joint support.

#### Phycox HypoAllergenic Soft Chews

Developed for dogs with food sensitivities or intolerances. Phycox HA chews use Hydrolyzed Vegetable Protein derived from soybeans, and do not contain beef, chicken, corn or wheat.

#### Phycox HypoAllergenic MAX Soft Chews

Phycox HA MAX chews contain the same Hydrolyzed Vegetable Protein as Phycox HA, in addition to six more ingredients and 3X the phycocyanin for maximum support of joint health.

#### Phycox Small Bites and Granules

Developed for dogs under 30 pounds or for dogs who may not be able to eat the larger Phycox Soft Chews.
