Essential Fatty Acids

Supplements Formulated for Dogs and Cats

The fish oils in Dechra's fatty acids supplements are from small, cold water fish (sardine and anchovy). The oil has been fully refined, deodorized, purified and molecularly distilled. It is tested and certified to be free from pesticides and below testing levels for PCBs and heavy metals, such as lead, arsenic, cadmium and mercury (less than 0.1 parts per million).

Tocopherol (Vitamin E) has been added to the fish oil as an antioxidant. Proper storage at room temperature, and away from light, will ensure quality through the expiration date indicated on the product.
