

# MicroSpore Leave-On Lotion

**CHLORHEXIDINE 2.3% WITH 1% KETOCONAZOLE**  
Contains 2% Chlorhexidine in free form and .3% encapsulated

## INDICATIONS

**A leave-on lotion formulated for dermatological conditions where a soothing topical lotion may be beneficial.**

**It contains an encapsulation system that provides continuing relief long after the initial use. This leave-on lotion may be used on dogs, cats and horses without leaving an oily or sticky residue.**

**MicroSpore Leave-on Lotion's natural biopolymer acts to form a barrier on the skin and hair to help protect against further irritation and damage. Its' unique protective barrier helps reduce adhesion of bacteria and yeast on the skin surface which helps to disrupt the onset of irritation.**

## NET CONTENTS

**8 oz squeeze bottles**
