Shaping the future  
of animal health

Shaping the future  
of animal health

## When REBOUND® Recuperation Formula is the right call.

Your patient's appetite or water intake might decrease for various reasons, including:

Adoption  
or rehoming

Boarding

Postoperative

Fostering

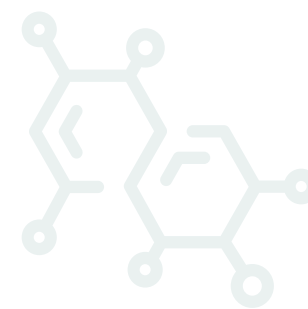

Illness requiring  
veterinary intervention

## Why REBOUND® Recuperation Formula?

You already know the importance of good nutrition, especially if your patient is recovering from surgery or adjusting to life at home after boarding, adoption, rehoming or while fostering.

- Balanced, fortified nutrition in a low-calorie, great-tasting liquid formula
- Rich in key nutrients for recuperation
- Palatable and easy to administer
- No added preservatives or colorants

## How it works.

- Supports immune function with zinc, arginine and prebiotics<sup>1,2</sup>
- Supports gastrointestinal tract integrity with glutamine<sup>3</sup>
- Supports skin health with zinc, arginine, omega-3 and omega-6<sup>4</sup>
- Antioxidants with B and E vitamins<sup>5</sup>
- Supports intestinal microbial balance with inulin and fructooligosaccharides<sup>2</sup>

Easy to  
administer.

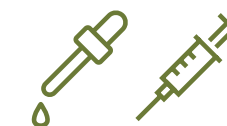

With food

In water
