

# Gel Positioners

**J1283**

**J1282**

**J1282E**

Gel Positioners are designed to aid in positioning patients for either surgery or radiographs. They provide firm but comfortable support.

- Made of viscoelastic polymer so it has a soft tissue like feel
- Provides constant support and will not bottom out
- Free from latex, silicon, and plasticizer
- Will not leak or flow
- Radiolucent
- Reusable
- Easy to clean with standard disinfectants
- Compatible with warming blankets
- 2 year warranty

**J1282**

**Shaped like a loaf of bread  
Flat Bottom Positioner**

**J1282** 12”L x 4”W x 3¾”H

**J1282A** 16”L x 4”W x 3¾”H

**J1282B** 20”L x 4”W x 3¾”H

**J1282C** 8”L x 3”W x 3”H

**J1282D** 6”L x 3”W x 3”H

**Trapezoid shaped gel positioner**

**J1282E** 10”L x 7”W x 3½”H

## Gel Contoured Positioners

Commonly referred to as sandbags. These are filled with gel which offers pressure redirection compared to harsh heavy rigidity of an actual sandbag.

**J1283** Standard gel filled sandbag

10”L x 4½”W x 2”H

**J1283A** Large gel filled sandbag

14”W x 4½”W x 2¼”H
