Background

Unpleasant animal-related odors are a common, daily occurrence, and managing them safely and effectively is an important part of keeping your work environment pleasant, your clients satisfied, and pets happy. Thornell specializes in creating products that permanently eliminate malodors - complex blends that work through counteraction, absorption, molecular bonding, inhibitors and residual actions. They are NOT masks. They are NOT enzymes. Each of Thornell's products is specially formulated for a unique purpose.

Uses

Feces, urine, and emesis are just a few of the common odors present in the Animal Zone of the clinic. This includes the kennel and grooming areas and the dog & cat wards. Use A.O.E. to eliminate odors on walls and floors and in cages and other large areas of the clinic. Keeping these areas clean and odor-free will ensure that all of your patients are sent home in optimal condition and that the unpleasant odors in the clinic are not going home with them. A.O.E. products eliminate odors, they do not mask them. They are not enzymes so they can be used in areas where other cleaning solutions have been used without a decrease in efficacy.

Directions for Use

WIPES

Easy clean-up for eyes and ears or use as a waterless pet bath. Use in litter trays, kennels and cages. Safe for use on hands, the pet, and other surfaces such as walls, floors, and counters. Professionals may also use for cleaning up after anal gland secretions or deodorizing exam room tables and equipment.

SPRAY

For quick, permanent results spray directly on the source of the odor (on the animal, accident area, bedding, cage, litter) or anywhere odor exists. If odor persists after A.O.E. has dried, the source of the odor has not been reached. Continue to reapply as necessary.

Use as an air freshener for quick but temporary relief by spraying two or more times in the air.

Product Safety

All Thornell products are safe for use on any surface or directly on the animal. As with any pet care product, consult with your veterinarian and review and follow the label directions. Contains water, proprietary essential oil blend and preservatives.

Keep out of the reach of children. For external use only.

Cautions

Spot test for color fastness before applying to any fabric. Do not spray directly into animals eyes.
