

ph·notix®

RESTORE A HEALTHY EAR BALANCE.

ph·Notix® is an enhanced cleaner that balances ear pH and helps restore the skin barrier.

When used with most problem-prone dogs and cats, it can support long-term ear health and help manage recurring issues.

RESTORE A HEALTHY EAR BALANCE

pH·notix®

Their medication's favorite sidekick.

Our pH-balanced formula won't interfere with most topical medications and can improve the overall effect of your ear care. Plus, it cleans so thoroughly that you'll only need to flush the ears once before medicating.

Removes gunk fast, so you can work faster.

pH·Notix®'s formula utilizes ceruminolytic agents to break down wax and debris quicker than other cleaners, reducing the time needed before examination or topical application.

Helps restore and maintain a healthy ear environment.

Our exclusive, antimicrobial lipacides support sebum regulation and restoration of the skin acid mantle, bringing balance to the ear environment.

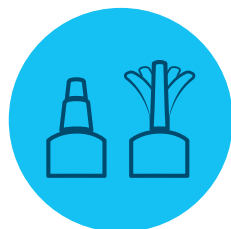

Ideal for routine use in stubborn ears.

The single-use, one-step application is designed with a dual-delivery system. It's more effective than basic cleaners and can better serve dogs and cats with recurring ear issues or wax buildup.

Makes dirty work less dirty.

pH·Notix®'s water-based formula doesn't require rinsing and won't leave behind oily residue.

After application, its hydrating agents help soothe and moisturize the ear canal.

Dual-delivery system

Paraben-free
