

INTRODUCING

SolutionKits™

Convenience, Compliance,
Complete SolutionKits™

Improve patient outcomes with same-day dosing and palatability. SolutionKits give veterinarians everything they need to compound prescriptions quickly and accurately. Each kit is made in an FDA-registered facility, and contains two pre-measured, and ready to mix components.

A. P. I.
SOLUTIONS

- Pre-measured bottles ensure that final product is mixed correctly
- Highly palatable sweet flavor that increases compliance
- No refrigeration required
- 2 year dating with 180-day shelf life after mixing
- Available in Enrofloxacin, Metronidazole, Doxycycline, & Gabapentin

Easy to store. Easy to mix. Easy to deliver.

Specifically formulated for veterinary use

- NDC # 46144-605-01

SolutionKits™ Metronidazole

460 mL 50mg/mL

- Contains Metronidazole USP Powder and SolutionKits Chicken Marshmallow Suspension Vehicle
- NDC # 46144-602-01

SolutionKits™ Doxycycline

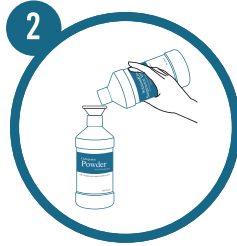

460 mL 50mg/mL

- Contains Doxycycline USP Powder and SolutionKits Chicken Marshmallow Suspension Vehicle
- NDC # 46144-604-01

Mixing Instructions

- Tap the powder bottle on a hard surface to loosen the powder. Do not shake.
- Shake the suspension vehicle for 5 seconds.

- Pour half the suspension vehicle into the powder bottle using the included funnel.
- Shake vigorously for 60 seconds.
- Pour the rest of the suspension vehicle into the powder bottle. Allow to drain for a least 10 seconds.

- Shake for another 60 seconds.
- Record compounding date on bottle.
- Dispense into a prescription bottle.
