Item # 48020

Rhinoscopy – Cystoscopy – Otoscopy

Originally designed for “over-the-endoscope-intubation” for small mammals, especially rabbits, the MDS-Vet™ Semi-Flexible Micro-Endoscope is useful in many ways, including rhinoscopy, cystoscopy and otoscopy.

A special thanks to Dr. Dan Johnson at Avian and Exotic Animal Care in Raleigh, NC for his photos and his support.

QUALITY - AFFORDABILITY - RELIABILITY

The MDS-Vet™ Semi-Flexible Micro-Endoscope allows diagnostic capability in areas of the body that are usually inaccessible. Although designed to aid in the placement of endotracheal tubes in small mammals, this endoscope may be used for feline and canine rhinoscopy, cystoscopy and otoscopy. This diagnostic tool provides a crisp, clear image and is adaptable to most video systems and light sources.

FEATURES:

- Two sizes available:
 - 1.9 mm x 6”
 - 1.0 mm x 6”
- 10,000-fiber image bundle
- ACMI-Storz®-Wolf light post
- Compatible with most cameras
- Completely immersible
- Portable LED light source

INCLUDES:

- Endoscope
- Portable LED light source
- Light post adapters
- Batteries

OPTIONAL EQUIPMENT:

- Operating sheath with 2 mm port
