

Titanium Hemostatic Clip

JoerVet

A high-performance clip
—that won't slip

A soft loading cartridge

A new generation
of applicators

Vitalitec International, GmbH is a surgical instrument manufacturer that has designed our high technology appliers exclusively to fit SLS clips.

Vitalitec International is certified to ISO 9002/ EN 46002. Our facilities include a Class 10 000 clean room.

Pure titanium

Pure titanium annealed to a malleable consistency providing maximum vessel occlusion and zero memory to prevent tip opening after application. Biologically inert, radiolucent and non magnetic for use with MRI or related scanning equipment.

Chevron shape

Chevron shape provides progressive and encompassing tip to tip closure before complete and secure occlusion of tissue or vessel.

Diamond shape grooving

Diamond grooving and interlocking atraumatic teeth design of the clip ensures enhanced security in vessel closure : striation is composed of small pyramidal heads, similar to tungsten inserts from needle-holders, insuring a firm multi-directional non hurting vessel grip.

Triangular shaped wire

Shaped Wire fits perfectly into the custom grooves of our applicators to provide mechanical power during application of the clip.

Atraumaticity

Special surface treatment and annealing provide a secure atraumaticity.

Small/medium exclusive size

Our new exclusive small/medium size has been designed to match specific intermediary vessel sizes requested by surgeons.

Developed Clip

Effective clip retention
Adhesive cartridge backing
Precise and effortless clip loading
Ergonomic cartridge design
