

ClotIt

Stops bleeding fast

ClotIt™ is a brand new all-natural, non-staining, blood clotting powder for animals, designed to rapidly stop bleeding in minor to severe external wounds.

Product benefits:

- Quickly stops minor, moderate or severe bleeding; even in extreme circumstances or challenging conditions
- Stops arterial bleeding
- Significantly reduces blood loss
- Does not stain animals' coats
- Easy to use – It is designed to be used by those with no medical training
- Cannot be over-used – no measuring or “dosing” needed
- Does not sting, stain, or burn animals or clinicians
- All-natural and safe if consumed in small quantities

ClotIt powder is white and does not stain.

Current leading clotting powder is yellow and stains.

How does ClotIt work?

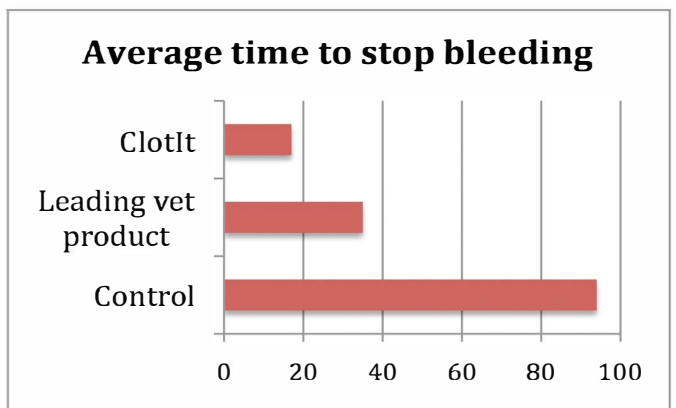

ClotIt is a patent-pending, triple-action compound of all-natural minerals. Upon contact with blood, ClotIt initiates and accelerates the body's natural coagulation cascade, while simultaneously slowing blood flow, by constricting local vessels and capillaries. ClotIt's fine granules rapidly absorb plasma at the wound site, leaving behind platelets and blood cells, to aid in forming a solid clot. This triple-action process results in complete clotting in seconds.

Intended use:

ClotIt is intended for use in moderate to severe bleeding wounds including:

- Skin tears, lacerations, grazes, cuts, sores and other skin integrity issues
- Injections, intravenous treatments, blood draws
- Dental procedures
- Tail docking and nail trimming
- Arterial and venous bleeding
- Cutaneous ulcers

Faster, cleaner, and more effective than the leading clotting powder
