

Never miss a beat

Hear pressure pulses loud and clear with APM by AM Bickford

The Audio Patient Monitor (APM) enables you to quickly identify time-sensitive disruptions in cardiovascular rhythm.

Compact, easy-to-use and affordable, the APM is backed by a 1-year limited warranty and includes:

- Esophageal stethoscope tubes (12F, 18F, and 24F)
- Microphone unit
- 4 C Batteries
- Protective case with kick stand

“ You actually hear heartbeats, not obnoxious beeping noises that are supposed to mimic heartbeats. I have been able to concentrate on the surgical and dental procedures while listening to the audible heartbeats produced by the esophageal stethoscope. Slowing or more rapid heartbeats produced by the Bickford APM prompt my staff that is monitoring the anesthetized pet to make adjustments to the anesthetic levels. ”

-Point Loma Veterinary Clinic Staff, San Diego, CA
