# GASTROINTESTINAL SUPPORT

## Pro-Pectalin™

### Four Essential and Unique Features:

- 1 Enterococcus faecium**, which is part of the normal intestinal flora:
  - Displaces pathogenic bacteria from intestinal attachment sites
  - Competes with opportunistic pathogenic bacteria for nutrients
  - Produces bacterocins, compounds thought to be directly harmful to pathogenic bacteria
    - $2.0 \times 10^8$  (200 million) CFU per cc of paste
    - $6.0 \times 10^8$  (600 million) CFU per tablet
- 2 Microencapsulation** helps protect the bacteria against low pH stomach acids
- 3 Kaolin** soothes irritated intestines and absorbs water and excess harmful bacteria
- 4 Pectin** absorbs water and helps firm stool

### Pro-Pectalin™ Tablets—Recommended Administration

*250 tablets per container*

Give one (1) tablet per 20 lbs (9 kg) of bodyweight orally every 8 hours.

### Pro-Pectalin™ Paste—Recommended Administration
