**FLEX 2500 is a nutritional supplement for the joints of dogs that contains high concentrations of Glucosamine, MSM, Creatine, and glycosaminoglycans.**

**Benefits:**

- Contains high amounts of . . .
  - Glucosamine
  - MSM
  - Creatine Monohydrate
  - Perna Canaliculus
- Addresses each component of joint degeneration
- Fortified with antioxidants and Omega-3 Fatty Acids
- Easy to administer and the soft chews have a palatable taste
- No known side effects

**How it works:** Glucosamine is a natural compound that is found in healthy cartilage in both humans and pets. It helps hydrate healthy joints by increasing the production of molecules that bind and hold water in the cartilage. Healthy cartilage provides cushioning which helps protect a pet's joints while exercising. Many believe that it provides clinical benefit in the synovial fluid by strengthening cartilage and aiding glycosaminoglycan synthesis. Further research on the effectiveness of glucosamine is still needed, but many of our customers find it to be very beneficial to their pets. FLEX 2500 also contains antioxidants like Vitamin E and Omega-3 fatty acids to complete a comprehensive joint support formulation.

**960 GRAM CONTAINER  
CONTAINS 120 SCOOPS**

**Active Ingredient(s):  
per 8 gram scoop**

Glucosamine HCl . . . . .	900 mg
