

Clindoral

Periodontal Filler (Clindamycin hydrochloride 2%)
Veterinary Medical Device

"The clear solution for oral health"

Effective barrier against food particles and microorganisms following extensive cleaning and scaling of teeth

- **Convenient**
Single-dose packs with no mixing required.
- **Easy to Use**
Blunt nose cannula allows application in hard to reach places.
- **Non-Refrigerated**
Two year shelf life at controlled room temperature (2° - 25°C)
- **Bio-adhesive and bio-eroding**
Through a process of reverse thermal gelation, Clindoral thickens in the gums and sulci remaining in place for 7-10 days and acting as a barrier against particles. It is then bioresorbed by the body and eliminated through normal metabolic means.
- **Sustained release**
of Clindamycin over 7-10 days.

Please read complete Instruction for Use (IFU) before using this product.
