

LubriSynHA Plus Hyaluronic Acid with MSM Companion Animal and & Equine Joint Supplement

LubriSynHA is Daily, Liquid, Oral High Molecular Weight Hyaluronic Acid(HA) with MSM that is Veterinarian Developed, Recommended and Approved.

Produced in US FDA Approved Pharmaceutical lab

Dr. Steven Allday is a well known and respected veterinarian whose 30-year practice has spanned the world. He specializes in equine sports medicine with a focus on thoroughbred racehorses. His credentials include five thoroughbred Horse of the Year, thirteen Triple Crown race winners, and twenty-nine Breeders' Cup race winners.

Dr. Allday is also an entrepreneur who is the founder and CEO of the LubriSynHA Family of Products. After years of injecting, Dr. Allday found the need to develop an oral HA formula and this LubriSynHA was born. LubriSynHA is a safe, natural alternative to injections which are hard on horses as well as their owner's wallets.

Product Information

- Promotes total joint health, bio-identical to healthy synovial fluid. Liquid, oral, high-molecular weight hyaluronic acid joint supplement to help relieve joint pain in pets.
- Liquid hyaluronic acid is absorbed in the membranes of the upper GI tract. Powders, pills, and pellets cannot be absorbed effectively.
- MSM has shown to relieve symptoms associated with arthritis; these vital elements create a natural, synergistic, anti-inflammatory effect.
- High-molecular weight hyaluronic acid is far superior in regenerating fluid than low molecular weight formulations.
- See results in 7-10 days and is backed by a safety/toxicity study.

Recommended Daily Dosing for Pets

Cats 1/2 tsp
3 mL

Dogs
Under 30 lbs
Under 14 kg 1 tsp
5 mL

30-60 lbs
14-27 kg 1-2 tsp
5-10 mL

60-90 lbs
27-45 kg 2-3 tsp
10-15 mL

100+ lbs
45+ kg 3+ tsp
15+ mL

Recommended Daily Dosing for Equine

Daily Dose 15mL
Maintenance Per 1200 lbs
Per 544 kg

Juvenile 10-15mL
Horse Per 1200 lbs
Safeguard Dose Per 544 kg

Uses

- Preventative care of all joints.
- Post-operative joint surgery to minimize the amount of inflammation and expedite healthy joint function for long term benefits.
- Address osteo-arthrits and degenerative joint disease on a regular basis with small toy breeds (front end conformational defaults) and large breeds (hip displaysia and stifle soreness).
- Help reduce or eliminate harmful injections in horses and toxic NSAID and pain medication use in small animals.
- Improve overall quality of life.
- Easy to use, simply top-dress on food daily.

“MARRS”; Multiple and regular revenue streams.

LubriSynHA for horses, dogs/cats, people and livestock.

“LubriSynHA is the best way to provide circulating hyaluronic acid to aid in healthy joint function. Nothing works more directly than HA. Maintain a higher level of soundness by keeping HA levels consistent.”
