

Tracking DiaGel's use with Dogs and Cats

We reached out to veterinarians who were already using DiaGel in their practice. We asked them to track the animal's progress after giving DiaGel. With the help of the pet parents and a poop scoring chart, there were a total of 148 dogs and cats included in the summary below (results may vary):

Here's how quickly we saw significant improvement

Trial Data - 2016

Let's firm things up.

DiaGel

DiaGel is an orally given gel that aids in reducing occasional loose stools due to environmental stress or changes in diet. The focused delivery of DiaGel quickly supports normal bowel function and in most cases, results can be seen in as little as 24 hours.

DiaGel is a made from natural active ingredients and has no known side effects. DiaGel products are available for dogs, cats and horses.
