

ANTIMICROBIAL WOUND BARRIER GEL

Vetericyn Plus[®] VF Antimicrobial Wound Barrier Gel for Veterinarians is intended for moistening and debriding wounds of all types and to provide a protective barrier over a wound. Can also be used to moisten and lubricate absorbent wound dressings. It contains synthesized hypochlorous, a known antimicrobial also produced by the animal during phagocytosis that can be used on all tissue without harming fibroblast cells.

Item #2047

Item #2045

Uses

- + Acute and chronic wounds
- + Cuts & abrasions
- + Burns, sores, ulcers
- + Degloving injuries
- + Dermal and mucosal irritations

NEW BARRIER GEL.

Newly formulated Barrier Gel offers users a high-viscosity option for dermal applications, moisture donating for wound management, or applying to dressings with pinpoint accuracy.

Features

- Vetericyn Plus[®] VF has been shown to have anti-pruritic activity along with antimicrobial action
- Septum cap (8oz) allows for drawing up desired amount of product and more precise application, decreases waste of product and reduces chance of maceration to adjacent tissues
- Eliminates wide spray and splash back
- Thicker gel promotes optimal moisture balance for wound healing

Benefits

- Aids in autolytic debridement
- Reduce incidence of exuberant granulation tissue (proud flesh)
- Provides protection from environmental exposure
- Protects wound bed from foreign bodies
- Adhears to areas difficult to treat
