

PROFESSIONAL ULTRASONIC CLEANERS

KEEPS INSTRUMENTS SPOTLESS FOR LONGER LASTING PERFORMANCE

JorVet ultrasonic cleaning systems represent the most advanced technology available today.

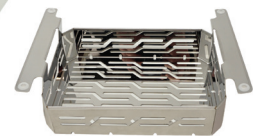

High frequency sound waves are used to produce more than 40,000 alternating high and low pressures per second. As these waves travel through a specially formulated cleaning solution, millions of microscopic bubbles form and violently implode. This process, known as cavitation, creates a scrubbing action capable of cleaning up to 16 times more efficiently than hand scrubbing. In minutes, all body fluids and foreign particles are removed, even from the tightest grooves, cracks, and interior surfaces of the instrument being cleaned.

FEATURES

- ▶ Control panel with 3-color LED display
- ▶ Two cooling fans improve heat dissipation
- ▶ Super sized ultrasonic transducer 45mm
 - ▶ 30% more power than standard transducer
- ▶ 100w Ceramic heaters
- ▶ Drainage valve
- ▶ Includes stainless steel basket
- ▶ AC 110v - 50/60Hz
- ▶ ETL (USA), CETL (Canada)
- ▶ 1-year warranty
