

VETADRYL™

Flavored Diphenhydramine HCl Tablet

In veterinary medicine, diphenhydramine is widely prescribed and primarily used for its antihistamine effects. Veterinarians also rely on diphenhydramine for its sedative effects for conditions such as motion sickness and antiemetic properties. Vetadryl™ is a flavored diphenhydramine HCl tablet formulated exclusively for veterinary use. Vetadryl is available in two convenient sizes, 10 mg and 30 mg tablets. Each chicken liver flavored tablet tested 7X more palatable than over-the-counter diphenhydramine and is scored for flexible dosing for even the smallest patient. Vetadryl can aid in the management of allergies, insect bites, motion sickness, travel anxiety, and other conditions.

Vetadryl is offered by PRN® - a name veterinarians have trusted for over 30 years. It is one more health management product developed by the makers of Proin® (phenylpropanolamine hydrochloride) and manufactured by a company that has brought you quality products for over 30 years.

Why Vetadryl?

- Veterinary formulation
- Two convenient sizes
- Scored for flexible dosing
- Chicken liver flavored
- From a name you can trust
