

FOR ANIMAL USE ONLY

NDC: 59051-9128-9

ThyroKare™ Equine Powder

Levothyroxine Sodium USP
(0.22%)

CAUTION: Federal law restricts this drug to use
by or on the order of a licensed veterinarian.

Net Contents: 10 lbs (4.536 kg)

KEEP OUT OF REACH OF CHILDREN

Active Ingredients:

Each pound (453.6 g) contains:

Levothyroxine Sodium USP 0.22% (1.0 g)
One teaspoon contains: 12 mg of T-4
One tablespoon contains: 36 mg of T-4

In a palatable limestone base with vanilla flavoring.

Precaution:

Store at 20°-25°C (68°-77°F) with excursions between
15°-30°C (59°-86°F) and protect from light.

Warning:

Administer with caution to animals with clinically
significant heart disease, hypertension, or other
complications for which a sharply increased metabolic
rate might prove hazardous. Use in pregnant mares has
not been evaluated.

Indications:

For use in horses for correction of conditions associated
with low circulating thyroid hormone (hypothyroidism).

Dosage:

The suggested initial dose is 0.5 to 3.0 mg levothyroxine
sodium (T-4) per 100 lbs of body weight (1 to 6 mg per
100 kg) once per day or in divided doses. Response to
the administration of ThyroKare Equine Powder should be
evaluated clinically until an adequate maintenance dose
is established. In most horses, the total daily dose of T-4
is in the range of 6 to 36 mg. Serum T-3 and T-4 values
can vary greatly among individual horses on thyroid
supplementation. Dosages should be individualized and
animals should be monitored daily for clinical signs of
hyperthyroidism or hypersensitivity.

Administration:

ThyroKare Equine Powder can be administered by mixing
the daily dose in the concentrate or by top dressing on
the grain, preferably rolled or ground. To facilitate the
proper adhesion of ThyroKare Equine Powder to the
ration, slightly moisten the grain with water or a liquid
supplement.
