Dr. Roger Mugford developed the “Halti” over 27 years ago in the UK. His creative design was the first to address the idea of a head collar for dogs. His concept has been used by over 1 million canine owners worldwide.

Jorgensen Laboratories is now offering the **Halti** head collars for distribution to veterinarians. Today veterinarians and their staff are often involved in behavior modification and training. The **Halti** comes packaged in an attractive hanging display with written training instructions and a DVD.

These collars come in a variety of sizes. Color is black with red trim.
